

Newsletter winter semester 2024/25: Sports and health science Master's degree courses

Dear students,

we would like to send you the latest information about your studies in a newsletter that will be published at the beginning of each semester. However, please always consult the following website:

<https://www.mh.tum.de/en/mh/academic-programs/sports-and-health-sciences-programs/>

If you have any questions, please do not hesitate to contact us:

studium.gsw.sto@mh.tum.de

We wish you a successful start to the winter semester 2024/25!

Best regards

Your Team at the Student Advisory Office

General information about the M.Sc. courses

School of Medicine and Health (MH)

The website of the school to which your degree programs are assigned can be found at <https://www.mh.tum.de/en/mh/homepage/>. You can find information on the degree courses in the “Academic programs” section under the heading “Sport and Health Sciences programs”.

Course Guidance

The Student Advisory Service team is happy to help you with any questions you may have about your studies at: studium.gsw.sto@mh.tum.de.

Current information and office hours of the student advisory service can be found updated daily under: <https://www.mh.tum.de/en/mh/academic-programs/sport-and-health-sciences-programs/student-advisory-service/>.

Valérie Lechevallier has been part of the Student Advisory Service team since

01.10.2024. On 01.11.2024 Stephanie Rübiger will return from parental leave and Stefan Unzeitig will leave TUM.

Communication and e-mail etiquette

Communication of information for studies is always done through the official channels of TUM, this includes essential information from the school. Therefore, check the website and your TUM e-mails regularly.

In addition, we recommend joining the Matrix-Chat groups for each degree program. In these groups you can exchange ideas on any topic, share information about events, part-time jobs, internships, etc., and you will also receive news about your studies.

Check back regularly: master_health_science (mhs:tum.de) or master_sport_science (mes:tum.de). Instructions for the Matrix-Chat as well as links to mobile and desktops apps can be found at <https://wiki.ito.cit.tum.de/bin/view/CIT/ITO/Docs/Services/Matrix/>.

For data protection reasons, students are requested to use only their own TUM e-mail address when communicating with university institutions.

Considering the following points for your e-mail inquiries within the scope of your studies will facilitate the assignment and processing of your request and enable respectful communication:

- Choose a relevant subject.
- Begin the e-mail with a friendly salutation.
- Use a greeting at the end.
- Sign your name to the e-mail.
- Include your matriculation number and degree program.
- Proofread your e-mail before sending it.
- Use complete sentences and paragraphs to increase readability.

Newsletter winter semester 2024/25: Sports and health science Master's degree courses

- Name documents with your last name when sending them as attachments.

Please refrain from sending duplicate and multiple requests to different e-mail addresses and persons, as this increases the workload and coordination effort.

Academic Matters

Please note the information and guidelines on study related matters (free electives, final thesis, recognition etc.) on the page of your course of study under "Information & Downloads":

<https://www.mh.tum.de/en/mh/academic-programs/sport-and-health-sciences-programs/students/study-programs/master-courses-m-sc/>.

Navigate through the pages by clicking to find information and documents. **Do not use search engines for this purpose, as they often provide outdated and therefore incorrect results.**

Monitoring the Progress of Studies

When registering for and taking examinations, it is important to pay attention to the progress of studies as defined in §10 APSO, the disregarding of which can lead to permanent inability to pass and de-registration.

If you have any questions, please do not hesitate to contact the Student Advisory Service.

Note on election catalogs in general:

The offer in the closed elective areas is constantly changing. Therefore, please note that the modules shown in the module overviews on the program websites can only be examples and a constant offer of modules is not guaranteed. The modules currently offered in the elective areas are listed at <https://www.mh.tum.de/en/mh/academic-programs/sport-and-health-sciences-pro->

[grams/students/study-programs/overview-elective-modules/](https://www.mh.tum.de/en/mh/academic-programs/students/study-programs/overview-elective-modules/). Places are allocated by lottery: there is no guarantee of getting a place in a particular module. Further information can be found at <https://www.mh.tum.de/en/mh/academic-programs/sport-and-health-sciences-programs/students/information-about-courses/>.

Note on the Transcript of Records

Incidentally, the number of failed attempts of an examination is not displayed in the Transcript of Records, only the passed achievements, see: § 26 APSO.

Information on the subject of plagiarism

According to the Duden dictionary, plagiarism means the following: unlawful appropriation of another person's thoughts, ideas or similar in the artistic or scientific field and their publication; theft of intellectual property. The consequences of this scientific misconduct can be failure to pass academic theses and dissertations; civil and criminal consequences are also possible.

The use of artificial intelligence in the preparation of written work is not permitted unless it has been expressly authorized as an aid. If artificial intelligence is used nonetheless, this constitutes deception about the independence of the work or the use of an unreliable aid.

Further information on good scientific practice and helpful information on writing papers can be found here:

<https://www.ub.tum.de/en/citing>

<https://www.ub.tum.de/en/course/cite-it-right>.

Insurance

Liability insurance is required to work in the Teaching and Educational Laboratory of the Prevention Center. Please also note that laboratory liability insurance is manda-

tory if you wish to work in the biology laboratory:

<https://www.hs.mh.tum.de/en/exercisebiology/teaching-thesis/lab-insurance/>.

Internationalization: Study abroad

We are pleased to introduce our new Moodle course "Study Abroad".

Here you will find the latest information on study abroad, information events organized by the School and the TUM Global & Alumni Office, current innovations and online modules that you can take at international partner universities. Register and don't miss any application deadlines: <https://www.moodle.tum.de/course/view.php?id=97282>

Of course you can also find all the information on our homepage at: <https://www.mh.tum.de/en/mh/academic-programs/sport-and-health-sciences-programs/students/international-office/>.

If you are interested in a stay abroad in the winter semester 2025/26 or summer semester 2026, please come to the online information event "Erasmus+ 2025/26" of the TUM Global & Alumni Office. Dates: Tuesday, 12th of November 2024, 4 pm - info event in German, Wednesday, 13th of November 2024, 4 pm - info event in English. The registration dates will be published on the homepage of the TUM Global & Alumni Office at a later date.

<https://www.international.tum.de/en/global/going-abroad/>

Following the information event on November 12th 2024, an online information event for students studying sports and health science degree programs at the TUM School of Medicine and Health will take place from 5 pm. The registration dates will be published at a later date on our homepage "Internationalization" under the heading "Latest Notes".

<https://www.mh.tum.de/en/mh/academic->

[programs/sport-and-health-sciences-programs/students/international-office/latest-notes/](https://www.mh.tum.de/en/mh/academic-programs/sport-and-health-sciences-programs/students/international-office/latest-notes/)

Information for the 1st semester

Basic modules: According to § 38 FPSO at least one of the basic module examinations listed in Annex 1 must be passed successfully by the end of the second semester.

Information for the 3rd semester

Master's Thesis: The third semester is the ideal time to begin planning your Master thesis. The first step is to contact and meet with potential supervisors based on your own academic interests. Many of the research chairs also publish possible thesis topics on their websites. Information on the Master's Thesis according to § 46 FPSO can be found on the website of your degree program under "*Information & Downloads*".

Workshop Master's Thesis: A workshop in preparation for thesis writing will be offered on 21 November 2024 from 18:00 to 19:30 via Zoom. The Workshop will have two parts: 1) General information, 2) Chairs/Lecturers/Researchers/Invited institutes presenting thesis projects. This workshop is meant for our second-year students, however, we will open the zoom also for interested first year students, to get an early overview. In the first part, we will present general information about the process of writing a Master thesis at the School of Medicine and Health and provide you with some hints about how to find your supervisor and a suitable topic. You are welcome to bring your questions. In the second part, the Chairs/Lecturers/Researchers/Invited institutes are invited to shortly introduce potential Master thesis topics. We are looking forward to welcoming you in this workshop. Please register: <https://tum-conf.zoom-x.de/meeting/reg->
