The **Faculty of Sports Sciences of Aix-Marseille University** offers **undergraduate** and **postgraduate** training in four key areas:

- **Physical Activities and Health**,
- **Sports Management**,
- **Sports and Physical Education**,
- **Research and Development** around **Human Movement** including **Human Factors, Ergonomics and Biomechanics**, and **Bio-engineering** of Tissues and Transplants.

Most courses available to exchange students are taught in French; therefore, a minimum **B1 level in French is required**. To support international students, a **French language course** is offered by the university during the mobility.

Our **Bachelor programs** are designed to provide students with a broad-based, multidisciplinary scientific foundation combined with professional skills development. **Four specializations** are accessible:

- **Adapted Physical Activity and Health** (APAS)
- **Education and Motor Skills** – Physical Education Teacher Training for Secondary Schools (General EM)
- **Ergonomics of Sport and Motor Performance** (ESPM)
- **Sport Management** (MS)

Our **Master programs** offer a complementary range of specialized study tracks with **Four specializations**:

- **Adapted Physical Activity and Health** (APAS)
- **Training and Optimization of Sport Performance** (EOPS)
- **Engineering and Ergonomics of Physical Activity** (IEAP)
- **Sport Management** (MS)

Within the IEAP Master's program, students may further specialize in one of the following study tracks:

- **Bioengineering of Tissues and Implants** (BTI)
- **Human Factors** (HF)
- **Engineering and Ergonomics of Human Movement** (IEHM)
